

What do we stand to lose?

- * Our health, and our livestock's health
- * Our safety, (on roads and on our property)
- * Our natural environment (and wildlife)
- * Control of our agricultural lands
- * Property values
- * Affordable electricity

We've tried it all!

- * Reviewed and commented on all the Province's documents
- * Requested Environmental Assessments for proposed wind farms
- * Warned the MOE of the implications of wind projects
- * Wrote letters
- * Signed petitions
- * Meetings... Protests...

The provincial government has not responded to the above, so before more Ontario residents are harmed...

WE ARE TAKING THEM TO COURT!

"The (GEA) and its regulations clearly do not appear to meet the requirements of law in the province of Ontario." —Eric Gillespie, lawyer

"There's no authoritative guidelines for the siting of wind turbines because there's no good evidence as to when they will be safe or not. This is not an acceptable state of affairs when we're planning to plunge ahead on such a large scale, a tenfold increase in Ontario." —Dr. Robert McMurtry MD FRCS FACS

The Ian Hanna Lawsuit will STOP current planned projects and FORCE proper medical studies which we are confident will lead to set-backs of a minimum of 1.5 - 2KM. This will kill many projects plus perhaps force rectification/compensation for built projects.

Early 2009: Ian Hanna retains prominent Canadian Environmental Attorney, Eric Gillespie.

Oct. 19, 2009: Mr. Gillespie files an Application to the Ontario Superior Court, for Judicial Review of Regulation 359/09 (the "Regulation") to the Environmental Protection Act, R.S.O. 1990, c. E.19 (the "EPA") seeking a declaration that sections 35, 53, 54 and 55 of the Regulation are invalid.

Sept. 30, 2010: The hearing date.

Queen's Park Protest: April 28th, 2010

HOW?

SUPPORT
the Lawsuit
against the
Green Energy Act

Ian Hanna is the plaintiff, a farmer on a small island in Prince Edward County, and the brave man who has stepped up to represent all rural Ontario residents faced with Industrial Wind Developments:

Success will have far-reaching impacts on Industrial Wind projects across the entire Province. The Ontario Government is clearly not listening to concerned citizens about this issue – the only way we can be heard is to drag the government in to court where a judge forces them to listen.

The overall significance of this case was indicated by the presiding judge (Madame Justice Swinton) who wrote of a recent CANWEA motion to be admitted as a full party to the legal case, *“If the application succeeds, the members (of CanWEA) will no longer have an opportunity to obtain regulatory approval for the construction of new wind energy projects in Ontario, and the development of utility-scale wind projects in Ontario will be effectively halted for an indeterminate period of time.”*

This Application holds that there is great scientific uncertainty around the health effects of industrial wind turbines, which is not taken into account in the application and approval procedures for wind facilities established by the Regulation and consequently, the Regulation does not comply with the Statement of Environmental Values, the common law and international law. **It is, therefore, invalid, and should be struck down.**

We cannot do this alone. We need the moral

and financial support of fellow citizens who share our concerns and belief that this Government has a legal obligation to protect citizens in Ontario. As you know, the legal process can be long and terribly expensive – well beyond our means. The Government has an unlimited supply of tax dollars with which to fight us – we have only our limited resources combined with the funds people have donated, to carry us through.

Please add your voice to this call and your support to our effort. The legal action has begun in earnest and as each day passes the need for adequate funding becomes more and more critical.

Be assured, we are enormously grateful for your support.

Yours sincerely,
Ian & Marit Hanna
