### SSE

SSE's (Scottish and Southern Energy) core purpose is to provide the energy people need in a reliable and sustainable way. Our strategy is to deliver sustained growth in the dividend payable to shareholders through the efficient operation of, and investment in, a balanced range of regulated and non-regulated businesses.

To help achieve this, we have plans to invest around £6.7 billion between 2008 and 2013. The principal focus of this investment is renewable energy, but investment is also planned in thermal generation, electricity networks and in other areas.

To find out more about the projects we have under development, in planning and under construction, visit our [Project Portfolio](#).
